PIT STOP VOLUME 3, ISSUE 3 MAY/JUNE 2009

The Toilet Paper

PIT STOP Promotes Handwashing Safety

The single-most important activity people can engage in to prevent the spread of germs and disease is frequent and proper hand-washing. Hand washing is a vigorous, brief rubbing together of lathered hands, including wrists, back of hands, and between fingers followed by rinsing under a stream of water. (Source: cdc.gov)

If soap and water are not available, an alcohol-based hand gel should be used. The gel should be applied and hands rubbed together

until the gel is dry. Water is not necessary. The alcohol quickly dries while killing the germs that can transmit stomach flu, diarrhea, and colds. Minimizing these ailments in the workplace means decreased absenteeism and increased productivity.

PIT STOP offers optional hand-sanitizers in all units. We also feature standalone handwashing stations that contain soap, water, and paper towels.

80 Gallon Tanks = 22 % Larger Capacity

NOT ALL PORTABLE RESTROOMS ARE CREATED EQUAL!

PIT STOP uses the Synergy Brand unit that has the largest tank in the industry. The 80 gallon tank is 22% larger than other manufacturers that produce 55-60 gallon tanks. A larger tank means:

- 1) Less need for twice-a-week service
- 2) More people can use the unit while maintaining a sanitary condition.

When shopping for a portable restroom company, keep in mind that the best value is the larger unit from **PIT STOP!**

WE CAN SAVE YOU MONEY by monitoring the usage on units and tanks and recommending the appropriate number of units. In addition, we are able to verify the date and time your unit was serviced.

From every challenge comes an opportunity.

“Who you will be in the next 5 years depends on 3 things:

the books you read

the people you meet

the choices you make.”
